MASTER LOCK® UNVEILS THE NEXT GENERATION LOCK BOX FOR CONTRACTORS WITH DOUBLE STORAGE CAPACITY AND OPTIMAL FLEXIBILITY

The most versatile lock box launching in The Home Depot stores next week and now available on HomeDepot.com; storage capacity and flexibility optimal for contractors, home builders

MILWAUKEE (Sept. 12, 2023) – [Master Lock](#), the industry leader in padlocks and related security products, today launched the next generation of its flagship lock box bringing innovation to the key storage industry. With double the storage capacity*, easy to use features and increased versatility, the new lock boxes provide the ultimate solution for secure shared access to get the job done for contractors, home builders and tradespeople. The Next Generation Lock Box will be unveiled through an exclusive partnership with The Home Depot, debuting next week in the retailer’s nearly 2,000 stores nationwide and available now online at HomeDepot.com.

There are three models of the new lock box – [Model #5480D](#) with a removable shackle, [Model #5481D](#) wall mountable and [Model #5482D](#) with a removable cable – allowing for next level convenience for any user needs. These options bring ease of use and versatility, as well as security to any jobsite. The cable model provides maximum flexibility to secure it in hard-to-reach and discreet locations, making it even easier and safer for contractors to access job sites, tools or equipment.

“We know coordination of things like keys, fobs, garage door openers and more can be difficult for contractors and homeowners alike, which is why we reimagined the lock box with our end user in mind, prioritizing optimal storage space to accommodate larger items, and ease of use,” said Becky Fellows, senior category manager at Master Lock.

With double the storage capacity, users are able to securely fit more shapes and sizes of keys, fobs, garage door openers, key cards or other valuables in the new and improved lock box. This allows for the ability to provide secure access to even more personal or business assets, such as properties, storage sheds, construction equipment, tool cribs, and more. In addition to increased storage capacity, an integrated bin prevents lock box jamming, upward tilted dials improve ergonomics and readability, and the new fully removeable shackles and cable provide flexibility of placement for secure storage, no matter the location.

-more-

Beginning in 2024, the 5480, 5481 and 5482 Next Generation Lock Box models will also be available on MasterLock.com and via other national retailers. Visit [MasterLock.com](https://www.masterlock.com) for more information.

**Double the storage capacity of equivalent Master Lock models.*
